Critical shortages of essential generic injectable drugs are an ongoing crisis in U.S. healthcare. Shortages put patients at risk and waste hospital resources. Civica is a market-based nonprofit solution created by hospitals, and currently supplies medicines to health system members in 49 states.

Civica, Inc. (CivicaRx, Civica) is leading a movement for patients, not profits. Because eliminating shortages and stabilizing high prices are in the best interest of patients.

Preventing drug shortages and ensuring affordable, quality generics—because patients deserve stable prices and reliable access.

60 members, including
6 of the top 10 largest
U.S. health systems

Making quality outpatient generic medicines affordable and accessible, and building on Civica's mission by lowering consumer prices.

100M U.S. patients
accounted for by
insurer partnerships

Fostering philanthropic support for manufacturing and distributing affordable medicines—with insulin as their first commitment.

Nearly 30 members, including
leaders from every corner of
the diabetes ecosystem

Civica is the nonprofit solution for reliable supplies of quality generic medications.

- **Established in 2018 by hospitals, for hospitals.** Member hospitals and philanthropic organizations span the U.S., representing 1,400 hospitals and approximately one-third of all U.S. hospital beds.
- **Delivers essential medications used in America's ERs, ICUs and during surgeries.** Member health systems' doctors and pharmacists identify and prioritize the drugs most critical for quality patient care.
- **Brings together hospitals and drug manufacturers to work collaboratively,** ensuring a reliable supply of drugs for hospitals and predictable volumes for manufacturers.

Civica's 140,000 square foot state-of-the-art manufacturing facility based in Virginia will soon produce a steady supply of more than three dozen sterile injectables, all drugs that are currently in or near shortage.

The plant will also produce affordable biosimilar insulins, ensuring all Americans have access to lower cost insulins, regardless of their insurance status.

“Civica is the result of a lot of dedicated organizations and people coming together to resolve a significant problem, the availability and high cost of critical generic medications.”

NED McCOY
President and CEO, Civica
